- Includes Apricorn's Upgrade Software Suite for PC & Mac
- Converts old drive into external Hi-Speed USB 2.0 storage device
- No charge toll free technical support
- 3 year warranty

## EZ Upgrade makes upgrading your notebook hard drive as easy as 1-2-3.

This innovative kit includes all the hardware and software needed to painlessly transfer all the data from an old PATA/IDE or SATA notebook hard drive to a new hard drive in three easy steps.

EZ Upgrade includes: Apricorn's Upgrade Suite CD, a Hi-Speed USB 2.0 hard drive enclosure (USB 1.1 compatible) & USB cable.

EZ Upgrade is all you will need to easily transfer everything - data, applications, documents, address books, e-mail, settings, OS, and preferences - from the old notebook hard drive to a new drive, in three easy steps.

First, connect the hardware by sliding the new hard drive into the EZ Upgrade enclosure and connecting to the notebook's USB port. Second, run the included cloning software. Lastly, install the new hard drive into the notebook. That's it -you're finished!

Once the new drive is installed, the old drive can be used in EZ Upgrade's Hi-Speed USB 2.0 enclosure for external storage or as a state-of-the-art backup solution.

### Apricorn's Upgrade Suite includes:

**Apricorn's EZ Gig IV with Data Select for Windows** - Apricorn's EZ Gig Cloning Software with Data Select allows you to clone your entire hard drive or deselect data folders from the cloning process to save space. This gives you the option to clone your OS and applications to a smaller hard drive or SSD, while keeping your documents and media files on your original hard drive. EZ Gig's intuitive wizard steps you through the process in three easy steps. Simply choose the Source and Destination drives, click "Start Clone" and EZ Gig will take care of the rest.

**ShirtPocket SuperDuper! for Mac** - With ShirtPocket SuperDuper! Lite, creating a bootable clone of your hard drive couldn't be simpler. Compatible with both Intel and Power PC Macs and featuring a user-friendly interface that is easy to use, SuperDuper! is the most advanced disk copying program available for the Mac OS.

## Upgrade your notebook in three simple steps:

### 1 Connect the hardware

### 2

Clone your hard drive using the included software

### 3

Swap out the drives and you're done!
