

AEGIS MINI

1.8" ULTRA-PORTABLE HARD DRIVE

ULTRA-PORTABLE

The size of a deck of cards, the Mini weighs just 3.7oz

HIGH CAPACITY

Enough storage to backup or store your entire system, work files, MP3s, videos and photos

BUS POWERED

No need for an AC Adapter, the Aegis Mini gets all of its power from your laptop

INTEGRATED CABLE

Why carry around bulky cords? The Mini has the USB 2.0 or FireWire cable built in

EXTENSIVE SHOCK MOUNTING

The Aegis Mini protects your data with a 16-point omni-directional shock mounting system

FREE TECH SUPPORT

We stand behind our products with free technical support

Aegis Mini... security and reliability for your data that fits in a shirt pocket

The Aegis Mini ultra-portable 1.8" hard drive instantly adds up to 240GB* of capacity which is ideal for storing, sharing or backing up your valuable data. It's the perfect companion for travel between home and the office, or for extra storage on the go.

Compatible with both PC and Mac, Apricorn's Aegis Mini gives you the option of a Hi-Speed USB 2.0 or FireWire interface. The integrated cable wraps neatly around the Mini when not in use and draws all its power from the laptop, so an AC adapter is never needed. Pair this with Apricorn's Data Protection Software Suite and tiny footprint and you have the most comprehensive mobile backup and storage system available.

DATA PROTECTION SOFTWARE SUITE FOR PC & MAC

Apricorn's comprehensive **Backup software** includes Apricorn's EZ Gig II for Windows and ShirtPocket SuperDuper! for Mac. These powerful backup tools enable you to back up your entire system in one simple step. Perfect for real-time disaster recovery in the event of a hard drive failure, Apricorn's backup software suite enables you to compress your backups into a single file half its original size, restore individual files and password protect your backups.

Apricorn's **Synchronizing software** is comprised of Second Copy 2000 for Windows and Synchronize! X for Mac, and provides a variety of options to synchronize your system for file sharing and backup between multiple computers. This ensures that your data is always up-to-date between your systems, maintaining data integrity.

SMART-ER (SMART-Error Reporting) is a utility that monitors the health of your hard drive and can provide timely information that may help you avoid losing your valuable data due to drive failure. The Apricorn SMART-ER utility periodically monitors the health status of a systems internal hard drive.

*One gigabyte (GB) = one billion bytes; accessible capacity will be less and actual capacity depends on the operating environment and formatting.
