The Aegis Portable protects your data with a 16-point omnidirectional shock mounting system

### FREE TECH SUPPORT

We stand behind our products with free technical support

## Aegis Portable... secure, high capacity compact storage for people on the go!

The **Aegis Portable 2.5"** is the ultimate portable hard drive and backup system for PC and Mac. Its sleek, slim, self-powered design makes it the perfect traveling companion so you can backup or reinstall your data wherever you are.

With storage capacities up to 500GB\*, the **Aegis Portable** is the ideal hard drive to add additional capacity to your system. Perfect for storing photos, music and video files.

Engineered for people on the go, the **Aegis Portable** comes with everything that you need to take your data with you including your choice of an integrated USB or FireWire cable so you can be connected at a flick of a fingertip; a padded neoprene pouch to protect the drive while traveling; and Apricorn's Data Protection Suite for PC and Mac, providing backup, synchronization & hard drive monitoring for the ultimate in data protection.

## DATA PROTECTION SOFTWARE SUITE FOR PC & MAC

Apricorn's comprehensive **Backup software** includes Apricorn's EZ Gig II for Windows and ShirtPocket SuperDuper! for Mac. These powerful backup tools enable you to back up your entire system in one simple step. Perfect for real-time disaster recovery in the event of a hard drive failure, Apricorn's backup software suite enables you to compress your backups into a single file up to half its original size, restore individual files and password protect your backups.

Apricorn's **Synchronizing software** provides a variety of options to synchronize your system for file sharing and backup between multiple computers. This ensures that your data is always up-to-date between your systems, maintaining data integrity.

SMART-ER (SMART-Error Reporting) is a utility that monitors the health of your hard drive and can provide timely information that may help you avoid losing your valuable data due to drive failure. The Apricorn SMART-ER utility periodically monitors the health status of a systems internal hard drive.

\*One gigabyte (GB) = one billion bytes; accessible capacity will be less and actual capacity depends on the operating environment and formatting.
