- Includes Apricorn's Upgrade Software Suite for PC & Mac
- Converts old drive into external Hi-Speed USB 2.0 storage device
- Plug-n-Play
- 3 Year warranty

Introducing Apricorn's next generation hard drive upgrade kit, the **Xtreme Upgrade**. The Xtreme Upgrade kit is a complete hardware and software solution which enables users to upgrade their PATA/IDE or SATA hard drive utilizing the latest hard drive technology. The kit comes with everything you will need to quickly transfer all files, e-mail settings, applications and the operating system from the hard drive in your notebook to the new Xtreme hard drive.

Apricorn's 7200 RPM **Xtreme Drive** is the fastest available hard drive for notebook computers. This drive can improve overall system performance by 30%, providing desktop performance in a notebook computer.

Once the new drive is installed in the notebook, the old drive can be installed in the Xtreme Upgrade's Hi-Speed USB 2.0 enclosure for either external storage or backup.

The kit comes bundled with a 7200 RPM SATA hard drive, Apricorn's Upgrade Suite CD, a Hi-Speed USB 2.0 hard drive enclosure, (USB 1.1 compatible) 1 meter USB cable and an AC power adapter.

**Apricorn's Upgrade Suite** includes:

**Apricorn's EZ Gig II** for Windows and **ShirtPocket SuperDuper!** for Mac.

**EZ Gig II** is comprised of two modules: **Disk Clone & Disk Image** Ideal for users who require an exact copy of their hard drive. **Disk Clone** creates an exact copy of the original hard drive including the operating system, files, folders favorites and system settings. A cloned copy of a hard drive can be used for disaster recovery backup, or as a hard drive upgrade.

**Disk Image** takes a snapshot of your entire system and compresses it into a file up to half its original size. This method takes up less space, thus allowing multiple backups to a single drive. The Image option also allows restoration of individual files or folders and a password to be assigned to a backup image, providing security for your data. A detailed description for each image can be entered giving the user total flexibility to retain backups from multiple dates, or multiple computers.

**ShirtPocket SuperDuper! for Mac** is a highly acclaimed program that makes recovery painless, because it makes creating a fully bootable backup painless. Its incredibly clear, friendly interface is understandable, easy to use. And it runs beautifully on both Intel and Power PC Macs! SuperDuper's interface confirms all your actions in simple, clear language to ensure that the end result is exactly what you intended.
